

Seamen's Bank

Multiple locations. One unified solution.

The Problem

The entire security industry evolved out of a need to protect banks, and it's easy to see why. As high-risk environments, banks face a number of both internal and external security challenges, and Seamen's Bank was no exception.

Reliant on an outdated, analog security system, Seamen's Bank Vice President of Information Technology, Michael Andrini, was tasked with delivering a modern security solution for multiple locations that could be controlled via one unified platform.

Given the unique challenges associated with the banking industry, several things had to be considered to deliver a reliable and scalable solution.

Some of the key considerations included:

- Clear resolution required - for details such as bill denomination and count along
- Low-light and night vision requirements
- Anti-fraud - verifying transactions and resolving transaction disputes
- Professional camera monitoring

Seamen's Bank chose to partner with SCW due to our proven track record within the bank/finance industry for providing unified platforms, high-quality equipment and expertise in systems design and installation.

The Solution

With bank security more important than ever, SCW provided Seamen's Bank with a layered security solution that was efficient, scalable, and effective.

A unified surveillance platform was developed by SCW, including the latest in commercial-grade and top-of-the-line surveillance hardware. The platform recorded video and incorporated professional monitoring with AI-powered, event-based detections, ensuring quick responses to any security incidents.

With multiple locations and specific requirements, the system included a mix of the latest security surveillance technology:

Admiral 32 - The most advanced NVR on the market, it has features that make it easy to detect motion, line crossing, face detection and intrusions in real-time. For ultimate convenience, you can also remotely view your video feed from anywhere through all smartphones and tablets.

Admiral 16 - Boasts a 320 Mbps incoming bitrate, 16 state-of-the-art cameras with NDAA approval, mobile app compatibility, remote footage downloading ability, one-click firmware updates and VCA search/event-based email alerts.

Warrior 8.0 - An extremely popular camera model, it's easy to install and ideal for outdoor use as it doesn't trap moisture in the lens. The 86.5-degree lens with 4K resolution is a great balance between covering a large area and identifying faces and license plates.

Sheriff 8.0 - Resistant to vandalism, this camera has achieved a rating of IK10, the highest measurement rating for protection from physical damage for security camera products using the international standard IEC 62262 scale.

The Result

In an industry where security is critical, investing in robust security surveillance systems is crucial to safeguard customers, employees, and assets.

With five locations on a unified platform with 8MP cameras, SCW has helped simplify security while delivering a reliable, effective and easily scalable solution.

With crystal clear pictures, they've found it easy to verify transactions and successfully resolve transaction disputes - both important in combating fraud. Offering better safety for staff and customers, the new solution is also fully compliant with the National Defense Authorization Act (NDAA).

It's clear that by investing in modern security technology, you can make all the difference in protecting your staff, customers and assets while maintaining the safety and security of your business.

WHY SCW?

We understand the unique security challenges faced by banks.

As a high-risk environment, we understand the complexity and risk that comes from the variety of internal and external security threats banks face on a daily basis.

With a focus on smarter security, we're experts in delivering modern security solutions that can help with better staff management while providing better safety for staff, customers and assets.

NDAA compliant

All SCW cameras are compliant with the National Defense Authorization Act. In this NDAA guide, we talk about what the NDAA regulations mean to the security industry.

Built to last

SCW sells only commercial-grade equipment. This equipment is specifically designed for heavy use and scalability. With Seamen's Bank set to add more locations, it has the added peace of mind knowing the SCW camera system will scale up with it every step of the way.

After-sale service

The right equipment, combined with free, US-based, lifetime tech support, made SCW the perfect partner for Seamen's Bank.

Over 4,000 Five-Star reviews, with an average score of 4.9, say more than we can about the standards of our business practices at SCW. All of the cameras installed for the project included SCW's standard 3-year warranty. That standard warranty can be extended to five years of
